=====

One possible model for f78r is:-

Column 1:	o	qo	y	ol	or	l						
Column 2:	ch	sh	k	t	d	r	s					
Column 3:	e	ee	a	o	ckh	cth						
Column 4:	dy	ky	y	n	in	iin	iiin	r	ly	m		
	(ol	or)										

Also: <p> and <f> appear to get added to either Columns 1 or 2.

One surprise was that <k> and <t> live in Column 2, while <ckh> and <cth> live in Column 3.

Note: when pairs of letters from the same column appear side by side, some appear in either order (ie, <e.ckh> and <ckh.e>), while others usually appear only in a particular order (ie, <t.ch>, <k.ch>).

<s> may also have a secondary meaning when used as the first (embellished) letter of a line.

**Col 1 --> Col 2:-**

( )	-->	ch	k	t	sh	d	s
ol/y/qo	-->	ch	k	t
